

Broker Services

Solutions to Set Your Brokerage Apart

zipLogix™ works closely with Brokers to ensure our products provide unbeatable value. Through our software products and suite of Broker services, zipLogix™ offers Brokers a total forms management solution that can help Brokers handle their inventory of real estate forms and ultimately run a more efficient and professional office.

zipForm® Plus Broker Accounts

Brokers have special pricing to purchase multi-users licenses for their office(s) consisting of several very attractive options. With a Broker account, zipLogix™ solutions provide administrative features for Brokers which allow seamless management of transactions and forms as well as the ability to generate reports on agent, office, and corporate levels. In addition to executive reporting, Brokers have the ability to track and monitor agents' transactions, set up group templates and clauses and additional management functions designed to help with efficiency and risk management.

Custom Forms Libraries

In addition to supporting state and local associations, zipLogix™ works with many Brokers to produce and maintain custom forms libraries. Our custom forms service integrates both standard association forms and custom Broker forms and provides on-going revision updates.

Custom Graphics

In addition to customizing the contents of your forms library, zipLogix™ can also help Brokers customize the look of their forms library by allowing Brokers to incorporate a company logo or business name into both standard and custom forms. zipLogix™ helps Brokers to increase brand awareness and customer loyalty while allowing agents to deliver a more professional presentation to their clients. (Custom graphics are not available for all libraries. Please call for availability.)

zipForm® Plus Custom Broker Screen

With our Custom Broker Screen Service, we can create a custom "skin" and brand the zipForm® Plus interface with your company logo and colors. Whether accessing your transactions at an important presentation or from a client's home, Custom Broker Screens help show your agents and customers that your firm is using the latest technologies to make the buying/selling process faster and less complicated.
